# **EcoEnergy to Donate, Match Funds for Community Club Park Improvement Project**

RICEVILLE, Iowa – June 4, 2008 – EcoEnergy, the company developing the EcoVista wind energy facility in Howard County, has pledged a \$500 initial donation and will also match the funds raised by the Community Club for its park improvement project.

“We’re pleased to be able to help improve the park for the residents of Riceville and the surrounding area,” said Paul Roeder, EcoEnergy wind project developer. “With our first donation of \$500, we’re hoping to encourage citizens and other businesses in the community to contribute to this worthy project. To really make everyone’s dollars count, EcoEnergy will match any other donations to the project up to another \$500.”

The EcoVista wind energy project will generate more than 200 megawatts (MW) of clean energy for the citizens of Iowa – enough to power more than 50,000 homes each year. In addition to property taxes paid on land where turbines are located, EcoVista will generate payments of approximately \$60 million over 20 years to county and municipal coffers. Construction on the EcoVista project is slated to begin in 2009.

EcoEnergy is an alternative energy solutions developer and a unit of the Morse Group, headquartered in Freeport, IL. The Morse Group of Companies, with over \$100 million in revenue, unites renewable energy project development, specialty engineering, design, industrial products, construction and automation services to provide commercial, industrial and utility markets throughout North America with electrical and energy solutions. Incorporated in Freeport, Illinois in 1944, the Morse Group has offices in Illinois, Iowa, Wisconsin, Minnesota and Nevada.
